

# Aviatrix Certified Engineer (ACE) Multicloud Network Associate

## *SAP Specialty Training*

The Aviatrix Certified Engineer (ACE) Multicloud Network Associate - SAP Specialty Training is the starting point of your multicloud networking and security education to support SAP migrations to the public cloud.

This 6-hour specialty training covers basic SAP fundamentals with a focus on S/4HANA, cloud networking components, and terminology of the major cloud service providers. The training also discusses challenges and limitations when utilizing public cloud infrastructure.

The training focuses on SAP S/4HANA design patterns from a multicloud networking and security perspective, traffic flows between various SAP system components, and common networking and security use cases.

### Course Objectives

- Learn SAP fundamentals with a focus on S/4HANA
- Develop a reference architecture for your multicloud network supporting SAP S/4HANA to ensure high availability and resiliency
- Integrate your preferred next-generation firewall vendor into your network architecture to secure SAP traffic flows
- Use intelligent networking to integrate cloud VPCs/VNets and on-premises resources to securely connect SAP components and users

### Intended Audience

This training was created for those responsible for migrating and managing SAP deployments in public hyper-scalers such as AWS, Azure, GCP, Alibaba.

- SAP Basis Architects
- Cloud Architects
- Cloud Infrastructure and Business Stakeholders
- Network and Security Engineers
- Operations Teams
- DevOps Engineers
